EXPERIENCE

Bicol University - University Registrar’s Office OJT Intern	Rizal Street, Legazpi City, Albay February 2026 – May 2026
- Developed and optimized the Services page of BU Registrar Online Request System, improving digital document retrieval times and establishing comprehensive office information to improve student access to show the services and about the Office of the University Registrar. - Adding and updating curricula and Transcripts of Records (TOR) data to the system of BU Registrar’s Office. - Managed student records and organized physical and digital documentation, improving information retrieval times for the office staff.	

ACADEMIC EXPERIENCE

Student Management System for Libon East Central School Undergraduate Capstone Thesis Project
Developed a secure, centralized Student Management System to digitize academic records, streamline the generation of school forms, and enhance overall administrative efficiency.
- Engineered a full-stack platform utilizing PHP, MySQL, and JavaScript. Integrated Composer packages to handle complex data management, facilitating bulk student data imports and the dynamic generation and export of mandatory school forms into PDF, Excel, and DOCX formats. - Implemented strict role-based access controls to safeguard sensitive student records. - Evaluated system performance and reliability against ISO 25010 standards, achieving an outstanding overall usability rating of 4.83 from 32 respondents. - Source Code Link: SMS for LECS GitHub - Documentation Link: SMS for LECS Final Manuscript

CartCraft: Online Art E-commerce Platform with Auction Based Transaction IS 311: IS Emerging Technologies and Trends – Final Project
Developed CartCraft, a comprehensive online e-commerce and auction platform designed to connect artists with enthusiasts and facilitate the seamless buying, selling, and promotion of unique artworks.
- Built a custom, full-stack marketplace utilizing pure PHP, MySQL, HTML5, CSS3, and JavaScript - Integrated Composer PDF to enable the automated generation and export of essential platform data, providing users and administrators with clean, downloadable reports. - Source Code Link: CartCraft GitHub - Documentation Link: CartCraft Presentation

Faculty Automated Schedule Tracker for CSD Faculty IS 204: Systems Analysis, Design and Development & IT 105: Information Management 1 – Projects
Developed a web-based scheduling platform for the Computer Studies Department to streamline student-professor communication by providing clear visibility into faculty availability and consultation hours.
- Built a responsive web application utilizing pure PHP, MySQL, HTML5, CSS3, and JavaScript. - Centralized faculty schedule tracking to replace manual inquiry methods, 24/7 access to view professor availability and secure academic guidance at their preferred times. - Source Code Link: FAST for CSD Faculty GitHub
